Put your APPLE™ on a DILLY DOLLY™ and move it easily

1. from room to room

•

2. to a secure area for storage

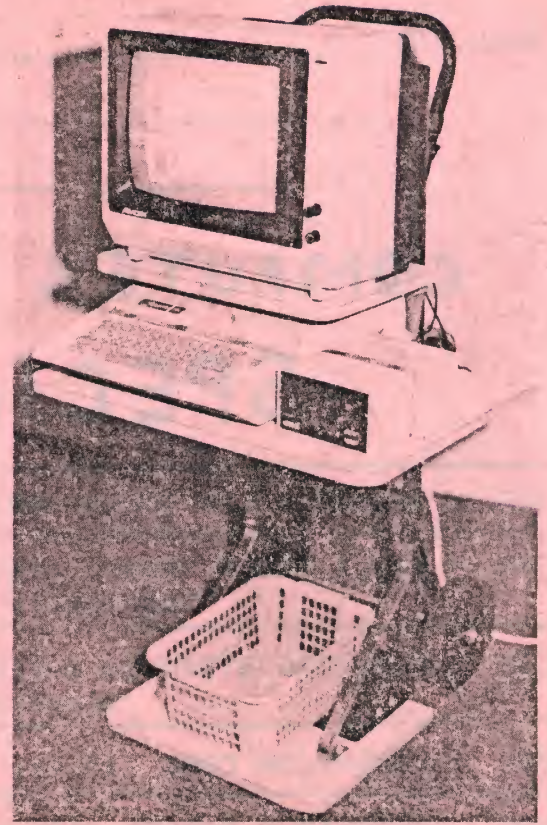

•

3. to any part of the classroom where a teaching station is needed

•

4. up and down stairs and ramps

•

The Dilly Dolly™ is a two-wheel portable cart for conveniently moving an Apple™ computer, one or two disk drives and a monitor up and down stairs and ramps, through doorways, and back and forth from room to room. Two Formica-covered shelves hold the computer, disk drive and monitor. The welded and bolted frame is securely supported on a wooden base 18 by 15 inches which is large enough to hold a basket of materials to be transported with the computer. The computer and disk drive are anchored in place on the lower shelf with easily removable metal straps. This shelf is 25 inches from the floor allowing the unit to be used AS IS as a teaching or working station. The monitor is secured on the top shelf by an adjustable woven nylon strap which can accommodate various monitor sizes. An optional 4 plug electric strip and extension allows computer and all accessories to be connected conveniently to a single wall outlet.
